

# Engineered for New Zealand conditions.

Bring the outdoors in at the touch of a button with a New Zealand-made EXO® louvre roof system. Contemporary, sleek and highly functional, it can be customised to suit any space.

When you specify an EXO louvre roof system, you get striking aesthetics and cutting-edge design underwritten by high-quality, durable aluminium. Choose the low-maintenance utility of a powdercoat finish, or the textural warmth of woodgrain.

## System Components

### Blades

Our unique blade designs use a sleek tongue and groove profile that is lightweight and can span up to 5m before another support or beam is needed.

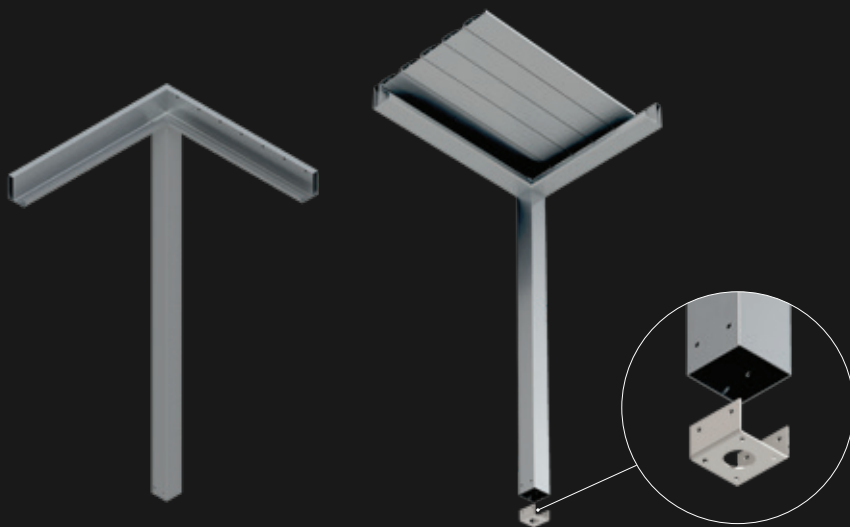

#### Blade Specifications

Blade Width	221mm	Weight	3.23 kg/m / 4.16 kg/m
Max Blade Length	3800mm / 5000mm	Material	6063 T6

### Structural Frame

Our structural frames can be customised to suit any space, with spans larger than 5.6m simply requiring another support or laminated beam. All connections have been engineered to be simple, strong and discreet for a clean, minimalist look.

#### Frame Specifications

Section	200 × 50 × 3mm RHS	Weight	5.4 kg/m
Max Span Between Posts	5.6m / 7.2m*	Material	6063 T6

\*Requires laminated beam.

### Key Benefits

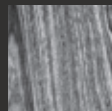

- Easily configured to fit any sized space
- Generous wide bays of 3.8m and spans of up to 5.6/7.2\*m
- Designed to ensure minimal visible fixings
- Integrated drainage system and leak proof gutter
- IP67 rated actuator for durability
- Can be fixed to an existing structure or freestanding
- New Zealand made using high-quality, durable aluminium
- Meets NZ building codes, including high wind zones.

### Finishes

Match any architectural style with powdercoat or wood grain finishes.
